

MEDICAL STUDENT PERFORMANCE EVALUATION

Mr. Edward Jones graduated *summa cum laude* from the University of Boston, with an impressive 3.99 GPA. His MCAT test scores were in the top 98th percentile, and he performed very admirably during his interview for medical school, where he demonstrated his ability to think critically in stressful situations. He came with an impressive record of academic excellence and community service, which he continued throughout medical school. During the entire course of his studies here, Mr. Jones also volunteered as a community mentor for at-risk youth, dedicating at least four hours a week to this role.

Mr. Jones performed admirably well in all of his courses during the first two years of medical school. He was especially well ranked by his teachers in Endocrinology and Gross Anatomy I and II. This is in line with his documented goal of becoming an Endocrinologist in the future. During the summer of his second year, Mr. Jones also voluntarily chose to take a research rotation, where he performed endocrine-oncology research under the guidance of Dr. Marilyn Rosenberg. He obtained a co-first author publication during his duration in the lab.

Mr. Jones has proven himself to be a dedicated and self-motivated medical student, and is a highly qualified candidate for a residency in endocrinology. He has completed many elective courses in the field, and has had very positive feedback and comments during his clerkships and medical rotations. To this effect, Mr. Jones is a well-liked and competent medical trainee, with significant clinical promise and strong research background in the field. All of his Attending Physicians on service have reported him to have an excellent bedside manner and the ability to work with children as well as adult patients. He has consistently demonstrated his excellent abilities in both medical knowledge, patient care, and dedication to community service throughout his tenure in medical school.
